DATE AND LOCATION

Paris (FR)   September 12th, 2019

Moving your IT to the cloud has become a real competitive advantage and the continued growth in cloud adoption proves it. And yet, many organizations still hold back for security reasons.

While IT is more comfortable moving their storage and compute or their applications to the cloud, they often worry if cloud providers can deliver the same level of security as their own physical data center.

Cloudflare will share with you what to consider before moving to the cloud, what are the quick wins, benefits and limitations of moving your web security to the cloud.

JOIN US AND GAIN INSIGHT ABOUT:

- What are the possible application and web security solutions to move to the cloud?
- Security factors to consider
- Advantages of a secure Cloud Provider
- Disadvantages

JOIN US for senior-level conversations, exchange of ideas and networking at **Be Exclusive Events'** Exclusive, intimate, by invitation only Executive Dinner – **Benefits and Disadvantages of Moving your Web and Application Security to the Cloud**.
