HOW CAN YOU EFFECTIVELY PROTECT YOUR HYBRID DATA AGAINST THE CONTINUING THREAT OF CYBERCRIME?

Join us and your peers in this exclusive event for senior-level conversations, exchange of ideas and networking

LOCATION & DATE

London, United Kingdom 23 June, 2022

Enterprises today want and need faster, more efficient data protection across a growing number of clouds, edge, and on-premises storage locations. Complex enterprise environments introduce risk when data silos or pockets of data are not well managed. Therefore, the enterprise approach to data management must become more efficient.

More organisations are moving toward a hybrid cloud environment to reduce their geographical footprint, reduce costs, and protect against data loss in the event of a disaster. But that journey remains challenging.

HOW ARE YOU REMOVING DATA SILOS TO PROTECT YOUR HYBRID CLOUD?

HOW ARE YOU MANAGING THE RISE IN CYBERCRIME?

AND WHERE DO YOU START?

Join us and **Commvault** and a select group of your peers as we discuss the best enterprise approaches to data management to thrive, accelerate, and digitally transform.

WE INVITE YOU TO AN ENJOYABLE NETWORKING EVENT, WHERE WE WILL DISCUSS:

- What challenges are you facing in your organisation's approach to hybrid cloud adoption? How are you removing data silos to protect your hybrid cloud?
- How are you implementing a proactive system to cope with the rise in cyber-crime on a day-to-day basis?
- In the event of a ransomware attack do you have all your bases covered?
- Has your security team identified a security risk pertaining to SaaS applications?

JOIN US for senior-level conversations, exchanging ideas and networking at **Be Executive Events** and **Commvault** intimate, Exclusive Dinner – **How can you effectively protect your hybrid data against the continuing threat of cybercrime?**

This particular event would be of interest to professionals with the following titles:

- Chief Information Officer
- Chief Information Security Officer
- Chief Technology Officer
- Chief Data Officer
- Chief Infrastructure Officer
- CxOs, SVP/EVP/VPs and Head of departments with responsibilities in **IT, Technology, Cyber, Cybersecurity, IT Security, Cloud, Infrastructure** and **Data**.
